BLUEGRASS COMMUNITY ACTION PARTNERSHIP –
SENIOR CITIZENS CENTER

Carol is an 83-year-old widow residing alone in a government-assisted apartment in rural Bourbon County. She had been a very active individual in her community before moving to Bourbon County but became isolated due to a lack of interaction with her peers. She came to the senior center looking for someone to play dominos with during the afternoon and she has found that and so much more. She now attends scheduled trips and outings both out of the county as well as local trips within the community. She is also actively engaged in educational opportunities, including speakers who offer information to keep her in tune with current changes in Medicare and open enrollment events which helped her enroll in the best medical plan and prescription drug coverage available to her. Her lively mood and spirit play a key part in her health and independence.
