BLUEGRASS COMMUNITY ACTION PARTNERSHIP -  
SENIOR COMPANION PROGRAM

David’s health is poor, requiring 24-hour care, and the health of his wife and primary caretaker was declining. The Senior Companion Program did an intake on him and paired him with a Denise, a senior companion. His wife was frail and in need of medical assistance that she had been ignoring in order to take care of David. A senior companion was placed in this home 3 days a week, 5 hours per day, so that he could get the necessary attention and rest to help his wife maintain her own health. The senior companion helped his wife by being available to care for her husband and meal prepping for both of them. As a result, his wife was able to attend medical appointments she had put off and get refills on her medications. When his wife is not at appointments, she is able to get some rest while the senior companion is at her home taking care of her husband, improving the health of both the client and his wife.
